

### Signs

For interior signs, consider dimensions, location and installation.

- ▶ Which timbers are both easy to work and durable enough for exterior use?
- Does the sign need to be portable?

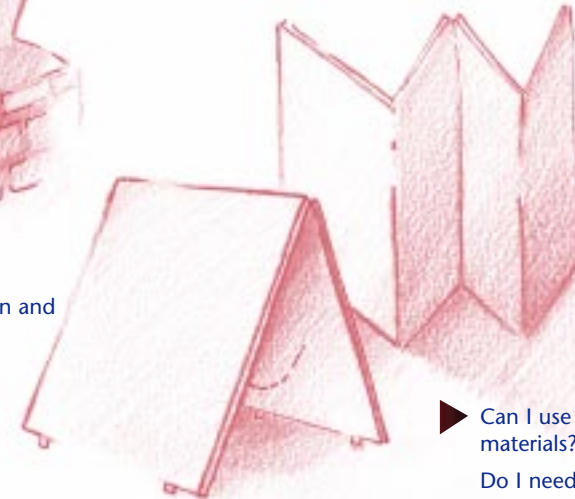

- ▶ How can I make my sign eye-catching?
- What message am I trying to convey with this sign?

- ▶ Is it stable enough to withstand windy weather?
- Will it require maintenance? Will it be difficult to maintain once installed?
- What sort of finish will I use?
- Natural timber finish may grey over time, paint may fade – can I protect the finish I use?
- Which timbers show a natural resistance to rot?

- ▶ Where will my sign be used? Will it be competing with other signs?
- How will I hang my sign?
- Does it need to be weatherproof?

- ▶ Do I require special equipment to make it?
- Do I need to investigate printing?
- What style would work best?

- ▶ Can I use recycled timber and other materials?
- Do I need to think about lighting?
